This report is to certify that I examined the above mentioned horse at Doran's Park on the 09/09/20, at the request of Gordon Pratt and Leith Doran. Within the limits of the examination the horse appeared to be in good health and body condition. She had a small and healing wound to the dorsal aspect of the right hind cannon bone. There was no pain reaction to limb flexion and no evidence of lameness at the walk or the trot. No significant abnormalities were detected on palpation of the limbs or on auscultation of the heart and lungs. There was no evidence of previous abdominal surgery, laminitis or ataxia. No specialized procedures such as endoscopy or radiography were requested or performed. Based on my examination, I find the horse suitable for syndication for racing.
